

CGHS & Ayushman CAPF Beneficiary Page Architecture

For Dr Bhasin's Lab, Greater Kailash-I, South Delhi | Architecture only - not final website copy

Core experience to design for

"I have a government health card. I want my blood tests done, preferably at home. Tell me what I need, check it for me, and make the rest easy."

The page should behave like a digital helpdesk: identify the visitor, route them to the correct path, explain only the next step, and repeatedly reassure them that the lab team handles the administrative process.

Primary website goals

- Rank for high-intent searches around CGHS empanelled pathology labs, CGHS home collection, CGHS cashless testing, Ayushman CAPF diagnostic services and force-specific searches.
- Make home collection feel like the default convenient option, while keeping centre testing equally available.
- Separate three visitor types immediately: CGHS retired/pensioner, CGHS serving/working beneficiary, and Ayushman CAPF personnel/dependant.
- Explain cashless vs paid-at-CGHS-rate simply, without forcing beneficiaries to understand TMS, referral categories or backend rules.
- Make official requirements (OTP, geotagged photograph, referral/prescription) feel secure and routine, not burdensome.

Ayushman CAPF beneficiary groups to name on the page

Official NHA/MHA material supports coverage for **serving personnel and eligible dependants** of the following forces/organisations:

Assam Rifles (AR)	Border Security Force (BSF)
Central Reserve Police Force (CRPF)	Central Industrial Security Force (CISF)
Indo-Tibetan Border Police (ITBP)	Sashastra Seema Bal (SSB)
National Security Guard (NSG)	National Disaster Response Force (NDRF)

Important wording: say "**serving personnel and eligible dependants**". Do not imply that all retired CAPF personnel are covered by Ayushman CAPF unless separately supported by an applicable scheme/document.

1. Entry Experience: identify me first

The first viewport should tell visitors that testing is available at home and at the centre, then let them identify themselves in one click.

Hero
Purpose: Answer the search query immediately and establish convenience.
How it should talk: "CGHS & Ayushman CAPF pathology testing - at home or at our Greater Kailash-I lab." Then: "Send us your card and prescription/referral. We will check what applies and help arrange the rest."
Visual / interaction: Split authentic visual: home collection + GK-I centre. Primary CTA: Book Home Collection . Secondary: Send Documents for Pre-Check . Phone: 011-49989898 .
SEO / AI role: CGHS empanelled pathology lab Delhi; CGHS home collection South Delhi; Ayushman CAPF diagnostic lab Delhi.

Interactive selector immediately below hero

I am a CGHS pensioner / retired beneficiary

"Show me the simple cashless process, what I need to send, and how home collection works."

I am a serving / working CGHS beneficiary

"Show me whether I can use cashless or pay at CGHS rates, and what I need for home collection."

I am Ayushman CAPF personnel / dependant

"Show me the CAPF process, what card to send and how cashless home collection works."

Interaction: each card is an anchor link to its own section further down the same page. On mobile, the three cards stack vertically. A sticky "Book Home Collection" button remains available as the user scrolls.

Tone rule for the whole page

Do not say: "You must complete OTP authentication, geotagging and TMS verification before availing investigations."

Say: "Send us your documents first. We will check them. When your collection is due, we will call from 011-49989898 for the required OTP and our authorised staff will complete the required geotagged photograph at your home or at the lab."

2. Path A - CGHS pensioner / retired beneficiary

This should be the simplest and most reassuring route, with home collection presented first.

1. All you need to do first

Send us a clear photo of your CGHS card and the prescription/referral for the tests.

2. We check it for you

Our CGHS team checks the documents and your current TMS status before collection. If your beneficiary record is still open at another HCO, we tell you so before we proceed.

3. Choose home or centre

Home collection is available. Free home collection is offered by Dr Bhasin's Lab when the applicable test value is above Rs 200, subject to serviceability. You may also visit GK-I.

4. We handle the CGHS verification

When required, we call only from **011-49989898** for the CGHS OTP. Our authorised staff completes the required geotagged beneficiary photograph at home or at the centre.

5. Sample collected - report follows

The sample is collected, labelled, transported and tested. The report is then delivered through the lab's normal reporting channels.

Cashless message for pensioners

Eligible CGHS pensioners are among the beneficiary categories for whom credit/cashless treatment is available under CGHS, subject to required documentation and the applicable CGHS process. The website should say this directly, then invite the beneficiary to send documents for a pre-check rather than explain backend claim rules.

Special 70+ panel within this section

If you are over 70

"CGHS gives you additional flexibility for direct specialist consultation. For cashless testing at a standalone pathology laboratory, send us the prescription/referral you have and we will check whether it meets the requirement."

The page should clearly explain that 70+ relaxation does not remove OTP/geotagged-photo and other applicable verification requirements, and it does not automatically make every test cashless.

3. Path B - Serving / working CGHS beneficiary

This route should remove the confusion between cashless entitlement and access to CGHS rates.

1. Send your CGHS card

Send us your CGHS card plus prescription/referral if you have one.

2. We tell you which route applies

Our team tells you whether your case can be processed cashless under the applicable CGHS category or whether you should pay at the applicable CGHS rate.

3. If you are paying, it is still simple

As per the laboratory's operating policy and applicable CGHS provisions, eligible Central Government beneficiaries can be charged applicable CGHS rates on presentation of the required identification/documentation, even where a cashless claim is not being processed.

4. Choose home collection or GK-I

Home collection remains available. The same document pre-check can be done before the visit/collection.

5. We complete the required verification

Where the CGHS/TMS process applies, we handle the OTP request and geotagged photograph as part of the collection workflow.

Key sentence to repeat on the page

"Cashless eligibility and getting CGHS rates are not the same thing. Send us your card and we will tell you which applies to you."

4. Path C - Ayushman CAPF personnel / dependant

This route should feel almost identical to CGHS. The only obvious difference for the visitor is the card they provide.

Who this route is for

Serving personnel and eligible dependants of **Assam Rifles, BSF, CRPF, CISF, ITBP, SSB, NSG and NDRF**. NHA guidance states that private HCOs empanelled under CGHS can provide OPD/IPD/diagnostic services cashless under CGHS guidelines/rates, subject to the applicable referral requirement.

1. All you need first

Send us your **Ayushman CAPF card** and the applicable prescription/referral.

2. We check the documents

Our team checks what is required for the cashless diagnostic process. The beneficiary should not have to understand the portal or scheme mechanics.

3. Choose home or centre

Home collection should be presented as the convenient default. The centre remains available for anyone who prefers to visit.

4. We complete the scheme verification

Use only the verification steps actually required in the live CAPF workflow. Do not automatically copy CGHS OTP/geotagging language to CAPF unless operationally confirmed.

5. Collection and reporting

Sample collection and report delivery then follow the same laboratory workflow.

Force names should be crawlable HTML text

Do not put the list only inside a graphic. The eight names and acronyms should appear as real text on the page so search engines and AI systems can associate the service with queries such as "BSF cashless pathology lab Delhi" or "CRPF Ayushman CAPF home collection".

5. Common page sections after the three pathways

After the route-specific sections, return to common information that applies to everyone.

Home collection - make this a major section

Purpose: Reinforce convenience and senior-friendly service.

How it should talk: "Prefer to stay home? Send us the card and prescription first. We will check them and arrange the collection."

Visual / interaction: Authentic home collection photo + simple 5-step horizontal graphic. State the lab's free-home-collection threshold clearly as a Dr Bhasin's Lab service, not a government entitlement.

SEO / AI role: CGHS home collection Delhi; CGHS blood test at home; CAPF home collection.

What should I keep ready?

Purpose: Reduce anxiety before collection.

How it should talk: "Keep your card, prescription/referral and registered phone nearby. We will guide you with anything else."

Visual / interaction: Four visual cards. Separate CGHS card and CAPF card examples. Add dummy documents with SAMPLE watermark.

SEO / AI role: Documents required for CGHS pathology test; CGHS OTP; Ayushman CAPF card.

Secure OTP and geotagged photograph

Purpose: Turn compliance into a trust message.

How it should talk: "For CGHS OTP verification, we call only from 011-49989898. Our authorised staff takes the required geotagged photograph during the home or centre collection process."

Visual / interaction: Phone + OTP + secure tick + home/location/photo icons. Include fraud-prevention line.

SEO / AI role: CGHS OTP diagnostic test; CGHS geotagged photo; TMS 2.0 verification.

Dummy card and referral explainer

Purpose: Show visitors what to photograph/send.

How it should talk: "Take a clear photo of these details and send it to us. We will tell you if anything else is needed."

Visual / interaction: Annotated dummy CGHS card, dummy Ayushman CAPF card and dummy prescription/referral. All fictional data.

SEO / AI role: CGHS card requirements; CAPF card; CGHS referral.

Prefer to visit the lab?

Purpose: Keep centre pathway visible without making it seem mandatory.

How it should talk: "You are also welcome at S-35, Greater Kailash-I. Send the documents beforehand if you want us to pre-check them."

Visual / interaction: Authentic exterior/reception image + map/directions CTA.

SEO / AI role: CGHS lab Greater Kailash; CGHS lab South Delhi.

Rates

Purpose: Answer rate questions without creating a fragile rate table.

How it should talk: "We apply the applicable CGHS rates. You can view the current official CGHS rate document below."

Visual / interaction: One text link/button to the official PDF. No rate table on the page.

SEO / AI role: CGHS pathology rates Delhi; current CGHS diagnostic rates.

FAQs

Purpose: Capture long-tail search and AI queries.

How it should talk: Answers begin with a one-sentence direct response, then 2-4 supporting sentences.

Visual / interaction: Accordion on web, but all text remains crawlable in HTML.

SEO / AI role: Question-led AEO for referral, cashless, home collection, OTP, 70+, CAPF forces and TMS status.

6. FAQ / AI-answer target list

- Can I get CGHS blood tests done at home?
- Is home collection free for CGHS beneficiaries?
- Is Dr Bhasin's Lab CGHS empanelled?
- Can CGHS pensioners get pathology tests cashless?
- I am a serving Central Government employee - will my test be cashless or paid?
- Can I get CGHS rates even if I am not using cashless?
- What documents should I send before home collection?
- Can I use a digital CGHS card?
- Why do you need an OTP for CGHS testing?
- Which number will Dr Bhasin's Lab call me from for the CGHS OTP?
- Why is a geotagged photograph required?
- Is the geotagged photograph taken at home?
- What if TMS 2.0 shows me as open at another hospital?
- What are the rules for CGHS beneficiaries above 70 years?
- Can a CGHS pensioner over 70 get cashless home collection?
- Who is covered under Ayushman CAPF?
- Are BSF, CRPF, CISF, ITBP, SSB, NSG, Assam Rifles and NDRF covered?
- Can Ayushman CAPF beneficiaries get cashless pathology testing?
- Can Ayushman CAPF beneficiaries get home sample collection?
- Do I need both a CGHS card and an Ayushman CAPF card?

7. Navigation and technical SEO / AI design

- Use one strong H1, then question-led H2s. Each H2 should be followed immediately by a short, direct answer before detail.
- The three beneficiary selector cards should use in-page anchor links: #cghs-pensioner, #cghs-serving, #ayushman-capf.
- Every infographic must have equivalent HTML text beneath it. Never place essential process information only inside an image.
- Use descriptive alt text, not keyword stuffing.
- Use Organization/MedicalBusiness, Breadcrumb and appropriate FAQ structured data only where the visible page genuinely contains the information.
- Include "Last reviewed" date and a concise medical/administrative reviewer line.
- Keep scheme-specific rules clearly labelled. Do not let AI or users infer that a CGHS-only rule automatically applies to CAPF.

8. Small reference line at page end

Do not create a large verification/document section. Use one discreet line after the FAQs/footer CTA:

Reference documents used for this page

CGHS Empanelled Diagnostic Centres - Delhi & NCR | CGHS Beneficiary / TMS 2.0 Instructions | CGHS 2025 Rates & Beneficiary Rules

Each title should be a direct hyperlink to the corresponding PDF. For CAPF, add the official NHA Ayushman CAPF beneficiary FAQ/guidance link.

9. Material to collect before design begins

The following inputs are enough to move from architecture to actual page design.

Input	What is needed
CGHS card image	Front/back or sample image. If real, we will create a fictional dummy version with no personal data.
Ayushman CAPF card image	Front/back or sample image for the CAPF explainer.
CGHS e-referral / manual referral examples	2-3 real-world formats with all patient data masked.
Accepted prescription example for 70+ workflow	Preferably from an empanelled hospital / applicable doctor source.
CAPF referral / prescription example	One or two examples actually processed by your team.
TMS 2.0 screenshots	One "ready/open for processing" example and one "still open at another HCO" example, fully masked.
CAPF portal/workflow screenshot	Only if your team uses a different portal or status view; mask all beneficiary data.
Home collection photography	Phlebotomist uniform, collection bag/kit, arrival, identity check, geotagged-photo step, sample collection, transport handoff.
GK-I facility photography	Exterior, reception, sample collection area.
Serviceability rules	Exact home collection area and any timing/distance restrictions.
Operational confirmation	Confirm that the Rs 200 free-home-collection threshold applies to Ayushman CAPF in the same way as CGHS.
Verification confirmation	Confirm which OTP/geotagging/biometric steps actually apply to CAPF so the page does not copy CGHS requirements incorrectly.
CTA details	WhatsApp number/link to use for document pre-check and home collection booking; confirm whether 011-49989898 is call-only or also customer-facing for other purposes.
Brand assets	Logo, website fonts/colour tokens, icon style if already fixed.

Reference basis used for this architecture

- CGHS Office Memorandum dated 03.10.2025: revised CGHS rates and rules, effective 13.10.2025.
- CGHS Office Memorandum dated 22.12.2025: fresh empanelment, beneficiary categories, referral/credit rules and special provisions including 70+ beneficiaries.
- CGHS Delhi & NCR diagnostic-centre notice: Dr Bhasin's Lab listed as a diagnostic centre and NABL.
- CGHS TMS 2.0 beneficiary advisory: digital card, OTP and geotagging-related requirements.
- National Health Authority Ayushman CAPF beneficiary FAQ (2024): serving personnel/dependants, eight forces including NDRF, and cashless diagnostics at private CGHS-empanelled HCOs under CGHS guidelines/rates.
- Ministry of Home Affairs parliamentary reply dated 04.12.2024: serving personnel of CAPFs, Assam Rifles, NSG and NDRF and their dependants can avail Ayushman CAPF benefits.
